

2011 Contingency Program Information

BRAID have been making competition wheels in Spain since 1979 when their first wheel design was used by Salvador Cañellas to win the Spanish Rally Championship in a Grp. 2 SEAT 124. Since that time **BRAID** have developed a vast range of competition and street wheels for almost every application and sport from Rally to formula and kart racing. Now made available in the USA and Canada by Michigan based Team Illuminata Motorsport **TIM** and used extensively in NASA, RallyCar, SCCA and X-Games by competitors who know that a successful season depends on reliable equipment.

Program Details: **BRAID**USA will provide a voucher for one 14 or 15" [monoblock rally wheel](#) via a random drawing at each of the following **Atlantic Rally Cup** events:

February 5, 2011	Sandblast Rally	Cheraw, SC
March 5, 2011	Mad March Stages	Stark, FL
April 30 - May 1, 2011	Rally Tennessee	Linden, TN
June 18-19, 2011	HyperFest Rally Sprint	Summit Point, WV
August 12-13, 2011	Rally West Virginia	Elkins, WV
September 24 - 25, 2011	Black River Stages	Harrisville, NY
October 15, 2011	TBA	mid-Atlantic-coast

All awards will be distributed at the awards banquet. Winners must be present at the time of the award or another name will be drawn until all prizes are claimed. Vouchers will be transferable. Vouchers must be redeemed through Team Illuminata Motorsport.

Registration: All crews must register prior to the start of each event. Registration forms will be available at scrutineering. Only registered vehicles with decals will be entered in the drawing.

Decals: All registered vehicles must use the supplied **BRAID** decals. The required decals will be provided by NASA Rally Sport and will be available during scrutineering. One **BRAID** decal must be placed on each front fender on each side of the rally car. It is the rally team's responsibility to properly and neatly apply all decals. Any damaged or obstructed decals will nullify participation in the contingency program. A representative from NASA Rally Sport will verify decal placement prior to the start of the rally. Participants must not have competing wheel decals on the car. Failure to install the required decals prior to the start of the rally will forfeit eligibility.
